

Caring for Poly Furniture

LuxCraft Poly Furniture is made from high-density polyethylene (HDPE). It never requires painting or staining and will not splinter or rot. It is also not affected by most corrosive substances. In order to maintain the beauty of your furniture, we recommend the following care tips:

- Clean with LuxCraft Poly Brite cleaner and rinse with warm water monthly (though some colors, such as white, require more frequent cleanings). For certain stains, it may be necessary to scrub with a soft bristle brush.
- Fasteners are 316-grade stainless steel and, although this is a premium grade, it is still susceptible to corrosion in extreme conditions (e.g., coastal areas with continuous exposure to salt water). In those conditions, it is recommended to rinse the furniture weekly with fresh water and wipe the hardware with a soft cloth.
- Do not place hot items on the furniture as this could potentially melt the material.
- Certain flowerpots or containers left on the furniture over an extended period of time could cause staining.

By following these simple steps, you will enjoy the beauty and comfort of your LuxCraft Poly Furniture for many years!
